Cross-functional teamwork, stakeholder communication, UI/UX collaboration

PROFESSIONAL SUMMARY

Frontend Engineer & Scrum Master with hands-on experience building and delivering scalable SaaS applications using React, TypeScript, and Next.js, combined with strong Agile leadership skills. Progressed from Frontend Intern to Frontend Developer and Scrum Master within 7 months, taking ownership of key application features and Agile delivery processes. Proven track record of delivering high-quality products, improving team velocity, and driving predictable delivery in cross-functional environments. Able to bridge the gap between business and engineering by combining technical expertise with facilitation and stakeholder management.

PROFESSIONAL EXPERIENCE

Frontend Developer / Scrum Master

04/2024 - 03/2026

Montrima AB (*Company closed: bankruptcy*) - Stockholm, Sweden

- Developed a SaaS platform for collecting, analyzing, and visualizing relationships across client IT infrastructures.
- Promoted from Frontend Intern to Frontend Developer and Scrum Master within 7 months, taking ownership of frontend delivery and Agile processes.
- Led Agile delivery for a cross-functional team of 5 engineers, achieving 100% sprint goal completion across 18 consecutive sprints.
- Led company-wide meetings and presentations in Swedish, effectively communicating project updates, progress, and key decisions to a broader audience.
- Facilitated Scrum ceremonies (planning, retrospectives, daily stand-ups), improving team velocity and delivery predictability.
- Improved delivery predictability and team efficiency by 15% through workflow optimization and impediment removal.
- Designed and implemented authentication systems (login, password creation, password reset) with validation rules and secure UX practices.
- Architected and implemented data management workflows, including soft and hard deletion, ensuring data integrity and system consistency.
- Built and maintained multilingual frontend (English / Swedish), improving accessibility and usability for end users.
- Implemented error handling pages and user feedback flows to improve application reliability and user experience.
- Developed reusable UI components and improved frontend performance.
- Contributed to the development of a production SaaS flagship platform using React, TypeScript, and Next.js, enabling effective collaboration with engineering teams.
- Implemented responsive UI features and improved user experience across key application flows.
- Delivered regular stakeholder demos, accelerating feedback cycles and improving decision-making speed.
- Coordinated bug fixing and production issue resolution, improving system stability.
- Collaborated with designers to deliver user-centered UI/UX improvements

Concepts: Component-Based Architecture, State Management, Performance Optimization

Owner & Founder

02/2019 - Current

Aleksandra Cislowski Företag - Stockholm, Sweden

- Managed end-to-end business operations, including strategy, sales, and client delivery.
- Achieved consistent year-over-year revenue growth through strategic planning and execution.
- Maintained client retention rate above 70% through strong relationship management.
- Negotiated and secured contracts with residential and commercial clients.
- Implemented quality assurance processes to improve customer satisfaction.
- Optimized operational workflows, improving scheduling efficiency and cost control.

EDUCATION

Master of Science (MSc): Biotechnology, October 2010 - July 2015

Wrocław University of Science and Technology - Poland

CERTIFICATIONS

- CSS – The Complete Guide (Flexbox, Grid, Sass), 2025
- React Native – The Practical Guide, 2025
- MERN Fullstack Guide (React, Node.js, Express, MongoDB), 2024
- Next.js & React – The Complete Guide, 2024
- React & TypeScript – The Practical Guide, 2023
- Understanding TypeScript, 2023
- React – The Complete Guide, 2023

PROJECTS & INTERESTS

Elsewhere Log – Travel blog built with Next.js, combining my interest in travel with frontend development. Features a custom content system based on Markdown, search functionality, and interactive maps (Leaflet).

Designed and implemented a content publishing workflow using Node.js scripts, improving consistency and reducing manual effort.

Focused on responsive design, accessibility, and SEO optimization (metadata, sitemap, structured content).
