Work Experience

Frontend developer / Scrum Master at Montrima AB

Apr 2024 - Present

I contributed to the development of the flagship product as a core team member while leading a team of five in the role of Scrum Master during agile sprints. I delivered monthly project demonstrations to stakeholders, highlighting progress and key milestones. In collaboration with design professionals, I focused on enhancing user experience and worked closely with the team to identify and resolve software issues. Additionally, I streamlined project management processes by leveraging advanced tools to improve efficiency and outcomes. After completing a 7-month internship, I'm excited to continue contributing to our team as a part-time frontend developer. My role centers on building responsive, dynamic web applications with a focus on React, Next.js, and TypeScript. I use tools like Docker and Azure Boards to keep projects organized and deployment seamless, while my experience in Figma allows for smooth collaboration with design, ensuring polished and user-centered results. Alongside my frontend responsibilities, I actively enhance my backend knowledge by working with Cypher and Neo4j, which strengthens our team's capabilities and improves our workflow. Driven by a passion for innovation, I am dedicated to refining both my technical skills and the quality of our projects. As a Scrum Master, I facilitate agile ceremonies (e.g., Daily Stand-ups, Sprint Planning, Retrospectives) to drive alignment and productivity, support team collaboration, and promote a culture of continuous improvement. I work closely with Product Owner to prioritize backlogs and ensure clear communication of goals, while identifying and removing obstacles to help the team deliver high-quality results and achieve project objectives efficiently.

Self-employed at Aleksandra's own company

Feb 2019 - Present

I managed daily operations while driving strategic growth initiatives and implemented a business strategy that delivered consistent year-over-year revenue expansion. I built and maintained strong client relationships, achieving a retention rate of over 70%, and secured profitable contracts with both residential and commercial clients to expand market presence. To ensure high standards, I established quality assurance processes that consistently exceeded client expectations and enhanced satisfaction. Additionally, I developed efficient operational workflows that optimized scheduling, resource allocation, and cost control.
